Work Authorization: Authorized to work in the U.S. — no employer sponsorship required.

PROFESSIONAL SUMMARY

Software Engineer (MS-CSIS) with 4 years of experience delivering scalable, resilient, and high-performance SaaS platforms. Hands-on experience building distributed microservices, REST/gRPC APIs, and containerized platforms using **Go, Java, Python, and AWS**. Proven track record in optimizing data flow and automating **CI/CD pipelines** to accelerate release cycles. Ready to drive system architecture, performance, and efficiency for high-growth engineering teams.

TECHNICAL SKILLS

Languages: Go (Golang), Java, Python, SQL, C#, JavaScript

Backend Frameworks: Spring Boot, Gin, Django, .NET, REST & gRPC APIs, Microservices, Cron, RabbitMQ

Cloud & DevOps: Docker, Kubernetes, GitHub Actions, CI/CD, AWS (EC2, S3, Elastic BeanStalk, IAM), Linux

Databases: PostgreSQL, MySQL, Microsoft SQL Server, NoSQL, Redis

Tools & Platforms: Git, Bitbucket, Postman, Agile/Scrum, Unit Testing

WORK EXPERIENCE

Scodus Innovations

Kathmandu, Nepal

Backend Developer

02/2022-11/2023

- Engineered high-performance, enterprise-level microservices using **Go and gRPC**, achieving a **40% reduction in API latency** for core service communications.
- Architected **CI/CD pipelines** using GitHub Actions and Docker, automating deployments to container registries and reducing manual release overhead by **60%**.
- Implemented asynchronous message processing using **RabbitMQ** to decouple services, increasing system throughput and fault tolerance.
- Optimized complex PostgreSQL queries and schema designs, resulting in significantly faster data retrieval and improved backend stability.

IshaniTech

Lalitpur, Nepal

Java Developer

01/2020-02/2022

- Developed scalable **Spring Boot** SaaS applications and RESTful APIs deployed in cloud-hosted environments, maintaining high availability during peak traffic loads.
- Improved database performance by **35%** through **Hibernate ORM** tuning and SQL query optimization.
- Collaborated on front-end integration using **JavaScript/jQuery**, enhancing UI responsiveness for customer-facing modules.
- Automated unit testing using **JUnit**, increasing code coverage and reducing production bugs by **20%** within an agile team.

PROJECTS

Cloud-Native API Deployment | [GitHub](#) | Django, AWS (Elastic Beanstalk, EC2, S3, IAM)

- Architected and deployed a **Django REST API** on **AWS Elastic Beanstalk**, configuring **S3** for cloud storage and implementing **IAM** roles with least-privilege security policies to manage **EC2** infrastructure.

Real-Time Chat System | [GitHub](#) | Go, WebSocket, PostgreSQL, Docker

- Developed a low-latency, 1-on-1 messaging platform in **Go** using **WebSockets** and **Docker**, implementing message persistence with PostgreSQL and real-time delivery receipts.

Web-Scraping & Data Pipeline | [GitHub](#) | Go, Gin, GORM, JWT, PostgreSQL, Docker

- Engineered a containerized **Go** platform using **Gin** and **GORM** that utilizes concurrent processing to achieve **35%** faster scrape times, featuring JWT-based authentication and **99.9%** system uptime.

EDUCATION

Saginaw Valley State University | Saginaw, Michigan

Master of Science in Computer Science & Information Systems (MS-CSIS)

01/2024-12/2025

Pokhara University, Cosmos College | Lalitpur, Nepal

Bachelor of Engineering in Computer Engineering (BCE)

09/2017-08/2022

Spoken Languages: Fluent in English, Hindi, Nepali
